DETAILED ACTION

Claim Objections

1. Claim 1 is objected to because of the following informalities: in claim 1, lines 8 and 9, where applicants recite, "...oxynitride...across the oxide layer..." should recite -- oxynitride...across the oxynitride layer--. Appropriate correction is required.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1-8 and 14-17 rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 6,503,846 B1 to Niimi et al. Although the conflicting claims are not identical, they are not patentably distinct from each other because the experimental results as shown in Fig.7 are similar to those of the application, and furthermore, as shown in Fig.7, there's a layer within the layer claimed by Niimi et al. which has uniform nitrogen profile forming a homogeneous SiON, thus reading on the claimed profile (Fig.7).
